Assignment

Feature Extraction

Prepared By:

Alisha Naeem

Roll No: BIT21013

7th Semester (Morning)

Submitted To:

Maam Fouqia

Feature Extraction:

Code:

```
% Read the image
Coins = imread('coins.png');

% Convert the image to binary
CoinsBW = im2bw(Coins);

% Find the boundary of the object (coin) at coordinate (27,60)
CoinBoundary = bwtraceboundary(CoinsBW, [27, 60], 'N');

% Display the original image
imshow(Coins);
hold on;

% Plot the detected boundary in red
plot(CoinBoundary(:,2), CoinBoundary(:,1), 'r', 'LineWidth', 2);
hold off;
```

OUTPUT:
